

1 In this task you will think about the situation illustrated here. You can do this task on your own or with a partner. You will need to use a table like this:

Hazard	Risk	Risk assessment	Risk control

2 Complete your grid by working across the page – hazard, risk, assessment, control. Then go on to the next hazard – and so forth. You should not simply be looking for the likely isolated hazards – you should particularly think about the interactions between the various elements in the illustrated situation.

Further/homework

Find out more about people who work at home, their legal situation, and the organizations that aim to support them.

L Learning

To revise and extend your understanding of how to be safe, and ensure the safety of others.
